

OPERATING INSTRUCTIONS RHINO RMS-300 MAGNETIC SWEEPER

USE THIS MACHINE AS YOU WOULD A CARPET SWEEPER. SIMPLY PUSH IT OVER THE AREA TO BE CLEANED, AND IT WILL PICK UP ANY FERROUS MATERIAL THAT IT PASSES OVER. THE HANDLE SWINGS DOWN, ENABLING THE SWEEPER TO OPERATE UNDER MACHINERY, WORK-BENCHES AND STILLAGES AND PARKS IN THE UPRIGHT POSITION 'B' .

WHEN THE MAGNETS HAVE COLLECTED A LOT OF WASTE, THEY BECOME LESS EFFICIENT. SO CLEAN THEM REGULARLY. TO DO THIS, HOLD THE HANDLE IN ONE HAND AND PULL THE RED PLASTIC GRIP 'A' IN THE DIRECTION SHOWN. THIS WILL DISCHARGE EVERYTHING THAT HAS BEEN COLLECTED ONTO THE GROUND OR COLLECTION SHEET, FOR DISPOSAL.

ALTERNATIVELY, THE SWEEPER CAN BE HELD OVER A WASTE BIN AND DISCHARGED DIRECTLY INTO IT. YOUR **RHINO MAGNETIC SWEEPER** WILL NEED NO MAINTENANCE WHATSOEVER AND THE MAGNETS WILL MAINTAIN THEIR STRENGTH FOR 50 YEARS..
